"Water is life!" - Call 2022 for the co-financing of an international cooperation project for the construction of drinking water supply systems

**TRANSLATION IN ENGLISH LANGUAGE
OF THE ORIGINAL PUBLICATION IN ITALIAN LANGUAGE
In case of dispute, the original Italian language version will prevail**

NOTICE OF ASSIGNMENT OF FUNDING

Lions Club Seregno AID, by December 31, 2022, received the applications from the Organizations participating in the selection for the "Water is life!"

The expressions of interest and the proposals received, of unequivocal value for the humanitarian purposes highlighted, were examined by the Council of the Lions Club Seregno AID. The proposal benefiting from the funding was identified by obtaining the maximum score in the evaluation grid published together with the call.

The funding is therefore assigned to:

Fondazione Fonte di Speranza Onlus (FDS) (Milano)

Lead organization of the partnership established with:

Little Step Sierra Leone

For the project:

"Gocce di speranza per Shanghai Compound"
(“Drops of hope for Shanghai Compound”)

Sierra Leone has a population of approximately 4.5 million and ranks 181 out of 191 in the Human Development Index. The site of the intervention is "Shanghai Compound", a suburb of the city of Kabala, the capital of the Koinadugu District. Here the water is taken from a stream, located 1 km from the suburb, with insufficient quantities to satisfy the needs of the suburb and frequently causing diseases such as cholera, typhoid and dysentery.

Fondazione Fonte di Speranza Onlus has built 29 wells and clean water distribution systems in the region. It operates in various states of Africa and Asia in the field of health, social and technological cooperation. In Italy it is engaged in raising awareness among citizens and in cooperating with local solidarity realities.

Little Step Sierra Leone, founded in 2000, contributes to the peace process and the reconstruction of Sierra Leone after 11 years of civil war. Since 2008 it has been collaborating with the Fonte di Speranza Onlus Foundation and is locally responsible for the construction of wells in the Kabala region.

The project aims to provide the suburb with an effective and safe well, capable of supplying clean water in sufficient quantities to meet the food and hygiene needs of the population. In addition, the system of distribution and transport of water using wheelbarrows and the entrusting of the well to the women of the village, trained to be "guardians of water and health"

PROJECT "GOCCE DI SPERANZA PER SHANGHAI COMPOUND"
BY FONDAZIONE FONTE DI SPERANZA ONLUS AND PARTNER - EVALUATION TABLE

Partnership characteristics

Evaluation criteria	Scores
Project Leader expertise on the project topic	5/5
Partners expertise on the project topic	3/5
